

AMENDMENTS TO THE CLAIMS

Please replace the claims, including all prior versions, with the listing of claims found below.

Listing of Claims:

1. (currently amended) A telecommunication terminal, ~~in particular a mobile telephone (1)~~, comprising:
 - an audible alarm device ~~for the purpose of~~ audible call signaling originating from the telecommunication terminal; and
 - an external signaling apparatus-(3) connected to the telecommunication terminal-(1) by means of cordless communication ~~for the purpose of~~ cordless call signaling, the audible alarm device ~~being able~~ configured to be turned off by activating the external signaling apparatus-(3), wherein ~~characterized in that~~ the audible alarm device is automatically activated if the external signaling apparatus-(3) is not operational or ~~the physical~~ a distance between the telecommunication terminal (1) and the external signaling apparatus-(3) exceeds a ~~particular~~ defined value.
2. (currently amended) The telecommunication terminal as claimed in claim 1, ~~characterized in that~~ wherein, upon receiving a call, the telecommunication terminal-(1) sends a signaling signal for activating silent call signaling to the signaling apparatus-(3) and, if the call is accepted by a user of the telecommunication terminal-(1), sends a signaling end signal for deactivating silent call signaling to the signaling apparatus-(3).
3. (currently amended) The telecommunication terminal as claimed in claim 1 ~~or 2~~, ~~characterized in that~~ wherein cordless communication between telecommunication terminal (1) and signaling apparatus-(3) takes place by radio or by infrared.
4. (currently amended) The telecommunication terminal as claimed in ~~one of claims 1 to 3~~ claim 1, wherein

~~characterized in that~~ the signaling apparatus-(3) is designed to output a visual, odorous or vibrating alarm.

5. (currently amended) The telecommunication terminal as claimed in ~~one of claims 1 to 4,~~
~~characterized in that~~ claim 1, wherein the signaling apparatus-(3) has a dedicated power supply.
6. (currently amended) The telecommunication terminal as claimed in ~~one of claims 1 to 5~~
claim 1, wherein
~~characterized in that~~ the signaling apparatus-(3) is designed to be carried on ~~the~~ a body of the user.
7. (currently amended) The telecommunication terminal as claimed in claim 6,
~~characterized in that~~wherein the signaling apparatus-(3) is automatically activated and an audible alarm device of the telephone is automatically deactivated when the signaling apparatus-(3) is being carried on the body of the user.
